Vancouver, BC | +1 236-865-6963 | tiyaverma2004@yahoo.in | linkedin.com/in/tiyaverma | github.com/Tiya-Verma

TECHNICAL SKILLS

Languages & Libraries: Java, JavaScript, Python, HTML/CSS, C, C++, Go, NumPy, PyTorch, Scikit-learn, Three.js, React Three Fiber, Web3.js

Developer Tools & Frameworks: React, React Native, Node.js, Git, Github, Google Cloud Platform, Visual Studio Code, PyCharm, Docker, npm, Vite, Tailwind CSS, MS Office 365

Design & Prototyping Tools: Figma, Adobe Photoshop, Procreate, Blender, Adobe Illustrator, Adobe After Effects, Final Cut Pro

WORK EXPERIENCE

Marketing and Engagement Coordinator

June 2025 – Present

youCode 2026 - UBC WiCS Hackathon

Vancouver, BC

- Lead multi-channel campaigns for youCode'26 showcasing values through visual storytelling & community impact.
- Curated tailored brand packages, and partnering with 25+ campus clubs and 50+ sponsors to enhance visibility.
- Analyzed social media statistics & feedback from 2024 and 2025 to design & strategize optimized brand campaign.

SWE Product FrontEnd Developer

June 2025 – Present

UBC MINT

Vancouver, BC

- Front-End Dev for MINT MOSS, building open-source software for neurotech EEG signal processing use cases.
- Partnered with BackEnd & UI/UX to implement core frontend logic, component architecture, & polished design.
- Developed unit tests to ensure reliability of frontend components and reduce regressions during feature updates.

FrontEnd Web Developer

May 2025 – June 2025

Nomadly.me

Remote - Freelance

- Built an interactive 3D globe with React 18, R3F/react-globe.gl, Three.js, Vite, Tailwind; layered custom texture.
- Loaded TopoJSON polygons; added flag hover labels, click-to-country routing, and custom atmospheric effects.
- Highlighted curated destinations via emissive MeshPhong markers, merged points, and a responsive full-screen UI.

PROJECTS

Ice-Cream Shop Pre-Order System | [Demo](#) | Java/Swing, React/TypeScript

July 2025 – Present

- Built Java OOP domain for an ice-cream shop using OrderQueue, enums, and EventLog to audit user actions.
- Implemented JSON persistence via JsonReader/JsonWriter & comprehensive unit/integration tests with JUnit 5.
- Developed Swing GUI & CLI to create orders, manage queues & emit structured events for transparent workflows.
- Added React + TypeScript (Vite) frontend with modular components & GUI aligned with the domain model.

Personal Profile | [Demo](#) | Three.js, React Three Fiber, JavaScript, HTML/CSS

May 2025 – Present

- Built a 3D portfolio with Three.js + React Three Fiber, showcasing advanced WebGL and modern JS tooling.
- Implemented smooth orbit controls, dynamic lights, and PBR materials for an immersive, responsive UX.
- Modeled assets in Blender; optimized lighting and camera rigs for clarity, realism, and fast loads.
- Built interactive controls so users can manipulate and navigate models independently in real time.

Delusion | NFT | Solidity, Ethereum, Web3.js, HTML, CSS, JavaScript, Procreate

June 2022 – Sept 2022

- Designed psychedelic NFT art in Procreate; produced assets and metadata for on-chain deployment.
- Developed ERC-721 contracts on Ethereum with secure minting, transfers, and role-based access.
- Optimized gas costs across core functions; added batch minting; cut mint fees under heavy network load.
- Implemented royalty distribution for secondary sales, aligned with EIP-2981 and marketplace standards.

EDUCATION

The University of British Columbia

Bachelor of Arts - Computer Science

Vancouver, BC

Sept 2024 - Present
